Ann,

If you could please follow up w/ folks there on your end regarding this mine proposal relative to the PMLU and potential for King Coal Highway. I am pulling directly from the EID, I don't know if anything has changed. The EID was prepared this past January (Jan 09).

PMLU "would encompass approximately 165 acres for Light Industry and Commercial Services along with Residential and Public Services. These land use areas would be situated approximately 0.5 to 2 miles west of the proposed King Coal Highway. The location of the proposed project with respect to the highway would provide a wide range of opportunities for office buildings, stores, apartment housing, motels, or similar facilities as well as residential areas. In addition, the western portions of the proposed project area would be located within close proximity to areas that may be incorporated into the Hatfield-McCoy Trail System once mining activity with the Miller Creek Watershed has been completed."

Hope this helps. Thank you!
